PRIOR ART

FIG. 1

This diagram shows an exploded perspective view of a portable electronic device. The top component, labeled 202, is a rectangular housing with a screen on the back and a keypad on the front. The keypad area is labeled 208. Below the keypad, there are several small, square components labeled 206. The bottom component is a base or support structure, labeled 204, which has a recessed area for the keypad and several small, square components labeled 206. A dashed line indicates the alignment between the two components.
